

The TempGenius Data Server (TDS) is the central point of contact for receiving, logging and alerting. The TDS makes alerting decisions sensor by sensor while storing months of records and sending alerts – without a separate computer. The TDS is an important part of what makes TempGenius alerts and data logging meet industrial reliability and monitoring standards. The TDS communicates with the Database via numerous protocol option. The TDS control unit has memory retention and UPS options for continued operation in power out conditions. The TDS is fully configurable, both locally and remotely, allowing changes while deployed.

The TDS is the most fail safe, cost effective, and flexible receiver platform on the market.

Specifications

TempGenius TDS

TDS-HP / TDS-HR

Wireless Specifications

Radio Type
Memory On-board
Frequency Options

Receive Only
Programmable Log Interval
418MHz, 433MHz, 900MHz, 923MHz,
1.2GHz, Wi-Fi

Battery Options
Antenna
Radio License

On-board UPS Option
3dbi RSMA
FCC ID: MCQ-XBS3B

Connection Features

Data Base Link
Web Diagnostics
System Configuration
Alert Dispatch
Data Type
Security Login

Outbound TCP/IP Push
Included
Retained On-board
Initiated by On-board Logic
Secure Proprietary Packet
Two Tier

Hardware Dimensions
Operating Humidity Range
Operating Temperature Range
Weight

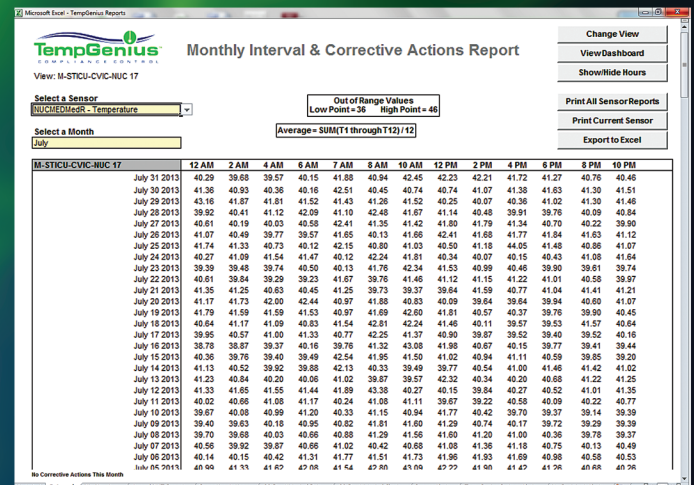

3" X 4" X 1.2" / 2" X 1.5" X .75"
0 - 95% RH +/- 1.5% RH
-45 to 95 Celcius
8 oz / 8 oz

Power source Requirement
Standard
POE (Power over Ethernet)

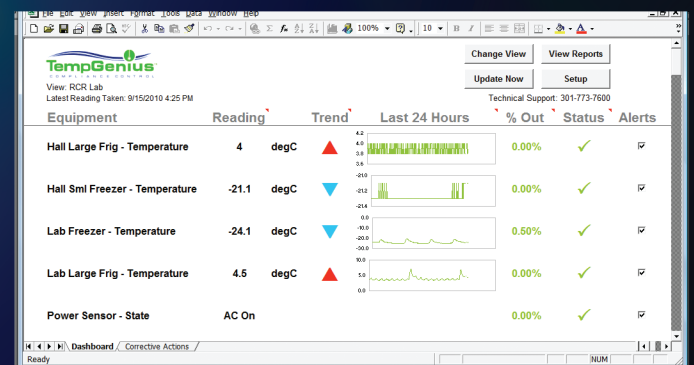

5 Volt Power Supply
Optional

Warranty

1 year Limited Replacement

Software Creates Custom Reports

Greatly Simplify Compliance Monitoring
